# Compost Tea Biology Submission Form

**Instructions:**

- Use a clean 1 liter plastic bottle. Beverage residue can strongly skew biology test results.
- Take several small samples from the center of your brewer and mix them together.
- Pour about 300 ml (or about 10 ounces) of the mixture into the bottle.
- A 1L bottle will be 1/3 full of tea and 2/3 of air. **A 20oz bottle needs 1/2 tea and 1/2 air.**
- **Yes, 1/2 air.** *Organisms in good compost tea need oxygen. Lots of oxygen.*
- Send samples by **Next Day Air** or similar service.
- See [www.soilfoodweb.com](http://www.soilfoodweb.com) for more detailed sampling instructions.

**Reminder:** NEXT DAY shipping is more vital for tea than any other sample. Delays may allow the biology in the tea to change significantly. Save on shipping and safeguard the biology by keeping 2/3 of the bottle filled with air.
